The ingredients selected in Prince Premium enjoy all the benefits possible for your dogs health which proudly make it a unique and incomparable product.

What makes Prince Premium special and different from other commercial products?

The ingredients included have been purposely included for your beloved dog because every ingredient selected has beneficial and particular purposes, which contribute to strengthen continuously your dogs body s functions.

### *Meats*

- The meats Prince Premium selected in its range of products are Gmo free and best grades possible enabling to have the highest nutritional values. The meat is a Fresh meat source and not frozen. It is not a by – product meat but includes only the best possible quality meat which is a human grade meat.
- Selected meats such as Ostrich is naturally rich in protein and contains no marbled fat. It does not attract harmful bacteria because of its ideal ph balance. It is rich in iron and has less cholesterol than low grade meats. Venison is also low in fat and contains little saturated fats. It is a good source of B12 and B6. The iron present in Venison and Ostrich help to transport oxygen from the lungs to the body cells and is also part of key enzyme systems for energy production and metabolism.

## *Biotin*

- Prevents fatigue, pain in muscles and deficiency in your dogs coat.
- Reduces surplus fat and strenghtens working dogs muscles.
- Is essential in the metabolism of carbohydrates and fats and therefore important for the breakdown and utilization of your dogs body.
- Helps in growth and maintanance of muscle tissues and repairing these tissues in case of any type of damage. It also ensures proper functioning of nervous system tissues,along with desired growth of the bone marrow.
- Biotin helps to revitalize lost hairs , stimulates hair growth thus mantaining a healthy coat.
- Helps to maintain a proper level of sugar in blood , especially for dogs suffering from diabetes.

## *Apple*

- With its substance Pectin, it helps to improve the intestinal health of your dog. Apples have high digestibility, maximum vitamins and bioactive nutrients.
- Vitamin A is good for vision, reproduction and urinary tract problems.
- A whole slew of B Vitamins ( thiamin B1, B2, B5, B6, B9 and B12 ) , which helps maintain a healthy coat.
- An apple has more fiber than most cereals making good for regurality and healthy stools.
- Good amounts of Vitamins for a healthy immune system and to fight off cancer causing free radicals.
- Niacin which can help blood vessels and lower cholesterol
- Phosphorous for healthy bones and teeth.
- Magnesium which is important for strong bones and also in the absorption of other minerals such as calcium and potassium (especially for pregnant bitches).
- Iron which the liver and blood need in order to function.
- Potassium a mineral that helps lower blood pressure and keeps the heart healthy
- Quercitin : that has been found to help fight cancer.

## *Mango*

- Is a rich source of vitamin A beta carotene, E and selenium which helps to protect you dogs health.
- It is valuable to combat poor digestion.
- Very efficient antioxidant.
- Contains phenols, phenolic compound has powerful antioxidants and anti cancer abilities.
- Unlike many fruits, mangos are rich in vitamin E. In addition they contain potassium, vitamin A, calcium, phosphorus, magnesium, copper, iron, zinc and fibre.
- Mango reduces the risk of developing cardiovascular disease, certain cancers and may boost eye health.

## *Papaya*

- A proteolytic enzyme contained in papayas, is very effective against allergies so if it is contact, environment , flea bite or even may reduce food allergy .
  - Several digesting enzymes called protease are present in papayas. The most important are papain and chymopapain. These enzymes have been shown to lower inflammatory responses and speed healing dog wounds. These compounds act synergistically with antioxidants such as vitamin C, A and E and carotenoids to reduce general inflammation.

## *Sweetpotatoes*

- Unlike many other starchy vegetables , sweet potatoes are an antidiabetic food.
- Contains unique root storage proteins, which are very important for your dogs daily energy needs.
- They are a good source of vitamin B6, manganese, copper , biotin, pantothenic acid , vitamin B2 and dietary fiber.
- An excellent source of Vitamin A, sweet potatoes have healing properties and a strong antioxidant food for your dog.
- Both beta- carotene and Vitamin C are very powerful antioxidants that work in the body to eliminate free radicals.

Free radicals are chemicals that damage cells and cell membranes and are associated with the development of conditions of heart diseases.

- Since these nutrients are also anti – inflammatory they can be helpful in reducing inflammation.

## *Tomatoes*

- Due to the high coated of lycopene , tomatoes lower the risk of heart disease , as well as other kinds of health complications in dog diseases.
- Free radicals which damage cells are flushed out easily with high levels of lycopese.
- Provide an excellent source of Vitamin C and K , carotenes,
- Biotin, source of Vitamin b6 , Niacin , folic acid, fiber and pantothenic acid.

## *Carrots*

- Beta – carotene present in carrots help to protect vision, especially night vision. Beta – carotene travels to retina where it is transformed into rhodopsin, a purple pigment that is necessary for night vision. Plus beta – carotene has powerful antioxidant actions and help provide protection against dog eye sight degeneration.

- Intake of carrots in our dogs diet are rich in carotenoids which may be beneficial to blood sugar regulation . Research has suggested that physiological levels as well as dietary intake of carotenoids may be inversely associated with insulin resistance and blood sugar levels.

- Since it is a diet rich in cartonoids it reduces the risk of heart Disease.

## *Spinach*

- Is a good source of Vitamin K , which aids in the formation of blood substance required for injured dogs and thus beneficial for blood clotting.
- Spinach is an anti – aging vegetable.

*Prince Premium*

- Contains carotenoid , that helps fight cancer and loaded with flavonoid that functions as a strong anti – oxidant.
- Spinach is a rich source of vitamin A and C.
- Prevents hardening of the arteries since it contains Choline and Inositol.
- Helps stabilize blood sugar amongst diabetic dogs.

## *Brown Rice*

- Is a very good source fibre and therefore helps to stabilize dog stools and also helps in seeing constipation.
- It has three times the fiber of white rice and its natural state is a better source of several nutrients such as riboflavin for your dogs growth . It has strong properties of iron and folate.
- Magnesium helps for proper blood circulation and helps to strenghten your dogs bones .
- Helps to synthesize cholesterol and fatty acids.

## *Rosemary*

- Is one of the oldest known medicinal herbs . It helps relax the smooth lining of the digestive tract.
- It contains chemicals that may help fight infection in the dogs intestines.
- Rosemary reduces joint pains and muscle tensions.

Strenghtens the coat of your dog , preventing dryness in the coat and stimulating hair growth.

Helps to relieve muscle pains , sore muscles and even arthritis.
