

Premium  
CAT FOOD

your cat comes first...  
...because we care

## **Because we care...** *...you need to know*

By choosing PRINCESS PREMIUM cat food you are introducing your cat to a unique range of complete healthy foods that fulfils their need for a natural diet.

Known to be very selective about what they eat, a cat will keep you guessing on dietary needs. They are capable of regulating their required level of nutrients and will feed accordingly, but with our greater understanding and research on the matter of 'you are what you eat' PRINCESS foods provides the variety and balance that meets the requirements of their lifestyle.

PRINCESS PREMIUM and NATURE'S POWER cat foods are packed with a vast integration of high quality protein and healthy nutrients. Our foods have been tried and tested, passing through a series of tests to ensure that they are devoid of artificial flavours, colourants and preservatives - enabling us to provide a full declaration of ingredients.

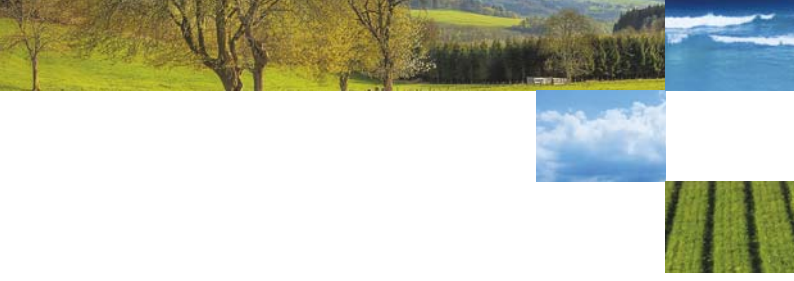

When choosing your pet food we recommend that you always read the label, check the ingredients and observe the quality - labels tell you what you are feeding and concentrated food means feeding less reduces the cost per meal.

### **Beware of:**

Cheaper food with low-grade ingredients may cause restlessness, allergic reactions such as tummy upsets, skin and coat problems that may eventually cost you more in veterinary consultations.

- Derivatives – cheap ingredients with little or no nutritional value - such as meat derivatives and by-products
- Excessive grains and cereals – lower digestive enzymes, deplete metabolic energy and increase the glycemic index in blood sugar levels
- Artificial colourants, and additives such as BHA, BHT, ethoxyquin are known to cause strain on vital organs, increasing possible disease
- High levels of sodium selenite are known to cause strain on vital organs, increasing possible disease affecting blood, muscles and liver. Also common grains fed to meat producing animals may contain sodium selenite, increasing the risk of being present in the sourcing of fresh meat
- High alkalinity increases pH balance and for cats this will lead to poor health. Acidic urine can cause calcium oxalate stones that form in the bladder, making the passing of urine a painful process
- Grooming – the process of cleaning the skin and coat to remove dead hair and sometimes parasites runs the risk of hairballs forming in the stomach. Regular grooming will help, especially when moulting

## Because we care...

*...there is nothing left to chance*

With a **unique grain free** dry food - exclusive to PRINCESS PREMIUM - we also have a range of natural wet foods that are designed to fulfil the different lifestyles of each cat while offering a convenient feeding regime to pet owners who will rapidly see the benefits of these quality products.

**Introducing your cat to PRINCESS:** changing food should be a gradual process. Mix with current food, increasing daily until the changeover is complete. As a creature of habit your cat may require some help if changing from wet to dry food. By warming wet food to body temperature palatability, texture and aroma may ease the transition.

### Feeding guides:

Ensure that you read the feeding guide in relation to your choice of food against breed, age and weight of your cat. As selective, fussy eaters digestibility is aided by quality food and your cat will be able to judge the difference.

Water should always be available but cats are sensitive to the taste of fresh clean tap water. They prefer stale water or water left out overnight.

### Weight watching:

Extra treats for your pet are fun although they should become part of a controlled diet. Cats may be tempted to eat in the wild but by feeding a superior food they soon learn the difference and generally manage to control their intake of nutrients by feeding accordingly. Competition when feeding multiple cats may encourage overeating and obesity.

### Guide to a healthy weight

**Thin:** Dull coat and general unhealthy appearance

*Ribs, spine and hipbones visible • thin neck • waist narrow*  
• abdomen concave • no fat under skin

**Underweight:** without being too thin – possibly due to having worms

*Ribs easy to feel, spine slightly visible • little fat under skin*  
• abdomen concave

### Ideal for weight

*Ribs can be felt but not visible • waist visible • abdomen slightly concave smooth curve from chest • small amount of fat is apparent*

**Overweight:** combine with lack of exercise

*Ribs and spine difficult to feel due to layer of fat • abdomen slightly rounded • folds on flanks that vibrate when walking*

**Obese:** clearly visible

*Ribs are difficult to feel under a thick layer of fat • Abdomen rounded*  
• flank fold prominent and will roll as the cat moves

**Our Guarantee to you:** the key to our place in the market is to provide a product that brings good nutrition to your pets, complete with nutritional support that ensures that you know what you are feeding.

## Because we care...

*...there is nothing to hide*

Every effort has been made to explain our ingredients and where the following information will benefit you it will certainly benefit your cat.

### **Meat – for nutritional value and fit for human consumption.**

Our meats are supplied to the highest possible standard of production and are accepted by the EU laws of vet and animal regulations under the IFS (International Foods Standard) certificate.

### **Natural raw materials consist of a blend of vegetables, vitamins, herbs, plant and fruit extracts – ingredients that offer a range of benefits:**

**Alfalfa plant** – improves auto-immune disorders, nourishing the digestive, skeletal, glandular and urinary systems. Purifies the blood, liver and bowel and lowers cholesterol levels.

**Aloe Vera plant** – antifungal and antibacterial effects help to destroy certain bacteria or parasites in intestines and the discomfort of inflammation.

**Blueberry fruit** – rich in vitamins C, B complex, E, A and copper, selenium zinc and iron. Promotes haemoglobin and oxygen concentration in blood, antibacterial and immune system builder.

**Biotin vitamin** – prevents fatigue, muscle pain and coat deficiency, essential in the metabolism of carbohydrates and fats. Helps to maintain blood sugar levels, especially for cats suffering from diabetes. Known to improve coat condition, intestinal tract and nervous system.

**Brown Rice grain** – has three times the fibre of white rice and contains a better source of nutrients while easing constipation and also supports growth, bones and blood circulation. Provides a much lower glycemic index than white rice.

**Chicory plant** – high in vitamin A, calcium and potassium, contains iron, niacin, phosphorus and vitamin C. Known for many benefits, from preventing enlarged liver and decreasing levels of serum and cholesterol, to aiding resistance to gall and liver stones. Can be effective in fighting intestinal worms and parasites while aiding digestion and cleansing the system of harmful toxins.

**Cranberries fruit** – known for aiding urinary tract infections but also helps to protect against heart disease, cancer, blood-flow and eye problems. Prevents plaque formation on teeth and breaks down starch.

**Eucalyptus plant** – antibacterial, antifungal, antiviral and antiseptic properties, rich in bioflavonoids and polyphenols helping to protect cat DNA cells. Acts as an antiseptic in the treatment of cystitis and mild diuretic problems. Aids respiratory conditions, regenerates new tissue and soothes aching muscles.

**Fennel plant** – facilitates digestion by reducing inflammations in the stomach, allowing the correct absorption of nutrients. Reduces gases and cures diarrhoea caused by bacterial infection.

**Lovage plant** – a useful plant for gastric discomforts such as flatulence, urinary tract inflammation while helping to clear gravel and stones from the kidneys.

**Parsley herb** – considered a potent disease fighting extract high in iron and vitamin C. Blood purifier supporting elasticity of blood vessels, aids tummy problems to improve digestion of proteins, fats and absorption. Promotes kidney activity and helps elimination of waste by forcing debris out of the urinary system.

**Psyllium plant seeds** – a dietary fibre used as an intestinal cleaner - absorbing toxins to improve better stools. Acts as a prebiotic, healing the inner lining of inflamed intestines, nourishing, lubricating and strengthening the colon walls.

**Rosemary herb** – one of the oldest known medicinal herbs - helping to smooth the lining of the digestive tract, ease joint pain and muscle tension and stimulate good coat condition.

**Spirulina supplement** – a great detoxifier, strengthens the nervous and immune systems. Helps to purify the liver, lowers blood cholesterol, enhances the ability to generate new blood cells, improves healing of wounds, prevents arthritis, cancer and heart disease. Important nutrient for healthy eyesight and in promoting good health increases energy levels.

**Taurine organic acid** – acts as an antioxidant and helps to prevent macular degeneration and other eye diseases. Reduces blood pressure and cholesterol levels. Improves detoxification of the liver, helps to strengthen heart muscles, reduces the accumulation of lactic acid which leads to fatigue.

**Yucca plant** – contains an anti inflammatory effect on arthritis and acts as a strong antioxidant that may benefit the reduction of cholesterol levels and antifungal activities. Acts as a good source of fibre to encourage healthy stools.

*“Over the last twelve years, trying to feed our incredibly finicky cat has been a trial – nothing truly satisfied him. He was in need of good nutrition to ease his digestive issues and finding Princess Nature’s Power has been a blessing. He just loves it! Enough for us to highly recommend Princess cat food to our family and friends”*

*Joe Mamo*

# GRAIN FREE DRY FOOD

## PRINCESS PREMIUM

PRINCESS PREMIUM grain free dry cat food is a unique product that is packed full of goodness and has no product fillers – low in the carbohydrates that may cause health issues.

This genuine pure caloric quality food is concentrated in rich natural ingredients of fresh chicken, fish, fruit and vegetables. It is formulated to ease digestion and combines with vegetables that are strong in energy, dietary fibre, vitamin E, vitamin B complex and iron.

Advanced new kibble helps to maintain healthy teeth and gums.

FOR ADULT CATS - ideal for healthy adult cats of all ages but also designed to help improve condition of cats suffering with poor health or allergy problems.

FOR KITTENS - small amounts of food from around 3 - 4 weeks depending on circumstances.

**Available in 2kg, 12kg bags**

## ADULT CAT 30% PROTEIN

### Ingredients:

**2kg • 1.5 whole lean chickens • 4 whole fish • 1.7kg mixed fruit • 1.95kg vegetables**

**12kg • 10 whole lean chickens • 26 whole fish • 10.3kg mixed fruit • 11.7kg vegetables**

Poultry (protein meal), Peas, Potato (starch meal), Fish (protein meal/oil), Fat (poultry), Eggs (protein/fat meal), Beet fibre, Linseed, Krill - crustaceans, Ammonium chloride, Lecithin, Minerals (salt), Taurine

### Analysis per kg:

Crude protein 30%, Crude fat 18%, Crude fibre 3%, Crude ash 8%, Calcium (Ca) 14g, Phosphorus (P) 11g, Potassium (K) 6g, Magnesium (Mg) 0.8g, Sodium (Na) 3g, Taurine 0.1%, Omega 3 fatty acid 10g, Omega 6 fatty acid 25g,

**Energy:** GE 17380 KJ

### Vitamins:

Vitamin A 20.000iu, Vitamin D3 2.500iu, Vitamin E alfa-tocopherol 250mg, Vitamin C 50mg, Vitamin B1 13mg, Vitamin B2 17.5mg, Vitamin B6 5mg, Vitamin B12 0.04mg, D-pantothenic acid 40mg, Niacin 40mg, Folic acid 1mg, Biotin 0.6mg, Choline chloride 2400mg

### Trace elements:

Iron (Fe) 200mg, Copper (Cu) 10mg, Manganese (Mn) 5mg, Zinc (Zn) 120mg, Iodine (I) 2mg, Selenium (Se) 0.2mg, Cobalt (Co) 1mg

**Antioxidants:** Tocopherol rich extract

**Preservatives:** Citric acid

*“My cat, Reggie, is not very well. He is disinterested in food and it is a great worry to me. I have searched in vain and paid highly for anything that would tempt him – all to no avail. A friend introduced me to Pet Princes Premium and to my amazement his response to the food has been overwhelming – he was even interested as I opened the tin. I live in the UK and I am just desperate for Reggie to be eating well to improve his current state of health”*

*Marion Hewett*
