GUIDLINE FEEDING

By joining the **PRINCE** and **PRINCESS** 'Royal Family' your pet has the unique opportunity of enjoying food fit for a king or queen!

Guided by experts, we are confident in supporting the demands of pet health and nutrition by keeping ingredients fresh, natural, honest and transparent. At Pet Princes we care and our aim is to always go the extra mile to ensure that foods remain unique to our belief. With a keen eye on the environment, our grain free dry foods and selection of nutritious wet foods contain a fusion of goodness that is well presented. We are aware that education is the key to helping pet owners understand the important factors of what is good for their pets and through our products and informative facts we offer the best, of the very best in pet care support.

There are so many foods on the market, however, sadly in our opinion few are the brands that manufacture for the love of pets. At Pet Princes the starting point is presenting the most genuine and healthy diets, regardless of cost, to ensure that they are physically and mentally healthier to live a longer life, thanks to our formulas.

We source the richest ingredients; high quality expensive meats, vegetables, fruits and natural supplements, to guarantee health through the

three key factors that contribute to digestibility, metabolic levels and biological values. Working on the nutritional benefits we are more than happy to select only quality ingredients from around the world.

Our company slogan strongly confirms that truly the health of your pet comes first!

This catalogue is not just about presenting current product lines, which will always continue to grow: it's also promoting Pet Princes as an alternative brand that gives us the opportunity to practice what we preach. This is highlighted in the pages of 'FACTS', that simply explain what makes the difference and to show that we are your pet's best friend.

Our ever expanding international family is constantly calling for more, and we are keen to promote the additions of grain free treats, natural oil supplements and pure shampoos, among an assortment of important pet necessities, including food for small animals and birds, to ultimately bring you the crown jewels in pet foods and accessories.

My team and I are proud of what we have achieved and our goal is to succeed in making **PRINCE** and **PRINCESS** stand out in the crowd. We take pride in our formulations simply because it's your pets that deserve only the best.

OUR STORY

PRINCE and PRINCESS began by focusing on producing healthy diets with genuine ingredients to make sure all our furry pets would thrive on a healthy lifestyle. Throughout the years our brands have always remained firm in the philosophy of Petnutrition as we continue to strive hard to bring new and intriguing ideas to the pet world.

'Pets mean the world to us, and rightly so, as our company slogan 'We are Pet Lovers' confirms our passion for pets, helping us to progress to a new stage and reach new goals.

Having achieved our dream the coming months will see the opening of a Pet Princes dry food manufacturing plant, together with research and development laboratories in Malta.

The purpose of this project will certainly help us improve on our current high standards, developing a kibble that is not cooked at the normal high temperatures preserves the nutrients to the highest level. This new venture combines in-house research with exciting nutritional, healthy formulas to produce nothing but the best with the latest technology and machinery.

We are looking forward to deliver more; our growth and success comes from loyal customers who have supported us from day one. PetPrinces would like to express gratitude to all the pet customers who have placed the PRINCE and PRINCESS brands in their homes. You have been an inspiration in helping us to lead the way.

RECOGNITION

In 2016 we were awarded the international Food & Beverage Award in recognition of this commitment to Quality & Business Excellence.

The Award was awarded by the Global Traders Leaders Club. Furthermore, in 2019 the company established itself even further by winning the Small Business Category Award at the Malta International Business Awards for healing through export and global growth.

DOG FOOD

PRINCE PREMIUM 'grain free' dry are carefully prepared wet foods packed full of goodness with specialised natural ingredients formulated to the highest possible standards.

There is nothing to hide and every effort has been made to list the full ingredients and detailing the benefits of promoting good health, inside-out.

MEAT

Special meats such as ostrich and venison, gnu, buffalo and wild boar add impact to the health benefits through low-fat and vitamins vital to generating healthy body cells, a key enzyme for energy production and metabolism.

GRAIN FREE

PRINCE PREMIUM and **SUPER PREMIUM** grain free dry dog food is a unique product that is packed full of goodness and has no product fillers; low in the carbohydrates that may cause

health issues. Advanced new kibble helps to maintain healthy teeth and gums.

This genuine pure caloric quality food is concentrated in the rich natural ingredients of fresh meat, fish, vegetables and herbs, complete with tempting aromas for palatability. It is formulated to ease digestion and combines with protein that is strong in energy and vegetables that are strong in dietary fibre with vitamin E and vitamin B complex (iron).

NATURAL RAW MATERIALS

Blends of vegetables, vitamins, herbs, plant and fruit extracts, ingredients that offer a range of benefits to you and your pet.

MEAT MEAL

We use only high quality grade meats. Meat meal is the dried end product. The process produces a protein powder by concentrating the water content of fresh meat into a higher percentage of protein, thus making the product more caloric and concentrated.

LAMB WITH SWEET POTATO FORMULA

12kg · 4kg (13mm kibble) (26% Protein · 14% Fat)

RECOMMENDED FOR:

Adult Dogs · Puppies medium to large breeds · Pregnant Dogs

INGREDIENTS:

Dehydrated lamb, fresh lamb, sweet potatoes, peas, potato protein, animal fat, dried potato flakes, split peas, beet pulp, vegetable gravy, flaxseed, carob flour, vitamins and minerals, fresh salmon oil, dried chicory (anatural source of FOS and inulin), dried carrots, dried apples, glucosamine, chondroitin, mono-oligosaccharides (MOS), plant extracts(Rosemarinussp, Curcumasp, Vitissp, Syzygium, YuccaSchidigera)

ANALYSIS:

Crude Protein 26.0%, Crude oils & fat 14.0%, Crude ash 9.3%, Crude fibre 4.6%, Moisture 8.0%, Calcium (Ca) 1.9%, Phosphorus (P) 1.2%. **Metabolic Energy:** 3,430 kcal/kg

VITAMINS:

Vitamin A 24,000 ui, Vitamin D3 2,000 ui, Vitamin E, alfa-tocopherol 500mg

TRACE ELEMENTS: Iron (Fe) 90mg, Copper (Cu) 13mg, Zinc (Zn) 100mg, Manganese (Mn) 40mg, Iodine (I) 1.5mg, Selenium (Se) 0.2mgCopper (Cu) 13mg, Zinc (Zn) 100mg, Manganese (Mn) 40mg, Iodine (I) 1.5mg, Selenium (Se) 0.2mg

TURKEY WITH SWEET POTATO FORMULA

12kg · 4kg · 2kg (9mm kibble)

RECOMMENDED FOR:

Small breed puppies · Active small adult dogs · Dogs with increase energy and fat requirements · Dogs in recovery

INGREDIENTS:

Dehydrated turkey, fresh turkey, sweet potatoes, peas, animal fat, split peas, flax seed, vegetable gravy, carob flour, vitamins and minerals, fresh salmon oil, potato protein, beet pulp, dried chicory (a natural source of FOS and inulin), dried carrots, dried apples, glucosamine, chondroitin, mono-oligosaccharides, plant extracts (Rosemarinus sp, Curcuma sp, Vitis sp, Syzygium sp, Yucca Schidigera)

ANALYSIS:

Crude Protein 31.0%, Crude oils & fat 19.0%, Crude ash 8.3%, Crude fibre 4.0%, Moisture 8.0%, Calcium (Ca) 1.9%, Phosphorus (P) 1.2%, Metabolic Energy: 3,740 kcal/kg

VITAMINS:

Vitamin A 20,000 ui, Vitamin D3 2,000 ui, Vitamin E, alfa-tocopherol 150mg

AMINO ACIDS:

Taurine 1,500mg Trace elements: Iron (Fe) 90mg, Copper (Cu) 13mg, Zinc (Zn) 100mg, Manganese (Mn) 40mg, Iodine (I) 1.5mg, Selenium (Se) 0.2mg

TURKEY WITH SWEET POTATO FORMULA

12kg · 4kg (13mm kibble)

RECOMMENDED FOR

Adult Dogs · Highly Palatable

INGREDIENTS

Fresh turkey, turkey meal, sweet potatoes, peas, dried potato flakes, split peas, lentils, beet pulp, flaxseed, vegetable gravy, fresh salmon oil, carob flour, chicken fat, vitamins and minerals, dried whole eggs, brewer's yeast, cellulose, dried chicory (a natural source of FOS and inulin), dried carrots, STPP (sodium tripoly phosphate), mono-oligosaccharides (MOS), plant extracts (Rosemarinus sp, Curcuma sp, Vitissp, Syzygium sp.)

ANALYSIS:

Crude Protein 24.0%, Crude oils & fat 12.0%, Crude ash 8.2%, Crude fibre 5.2%, Moisture 8.0%, Calcium (Ca) 1.4%, Phosphorus (P) 1.0%, **Metabolic Energy:** 3,350 kcal/kg

VITAMINS:

Vitamin A 20,000 ui, Vitamin D3 2,000 ui, Vitamin E, alfa-tocopherol 150mg

AMINO ACIDS:

Taurine 1,500mg **Trace elements:** Iron (Fe) 90mg, Copper (Cu) 13mg, Zinc (Zn) 100mg, Manganese (Mn) 40mg, Iodine (I) 1.5mg, Selenium (Se) 0.2mg

SALMON WITH SWEET POTATO FORMULA

12kg · 4kg · 2kg (13mm kibble)

RECOMMENDED FOR

Adult dogs · Sensible or allergic dogs

INGREDIENTS

Fresh salmon, dehydrated salmon, sweet potatoes, peas, dried potato flakes, split peas, beet pulp, flax seed, brewer's yeast, vegetable gravy, animal fat, vitamins and minerals, fresh salmon oil, carob flour, dried whole eggs, cellulose, dried chicory (a natural source of FOS and inulin), dried carrots, mono-oligo saccharides (MOS), plant extracts (Rosemarinus sp, Curcuma sp, Vitissp, Syzygium sp, Yucca Schidigera)

ANALYSIS:

Crude Protein 24.0%, Crude oils & fat 12.0%, Crude ash 8.5%, Crude fibre 5.1%, Moisture 8.0%, Calcium (Ca) 1.4%, Phosphorus (P) 0.9%, Metabolic Energy: 3,340 kcal/kg

VITAMINS:

Vitamin A 24,000 ui, Vitamin D3 2,000 ui, Vitamin E, alfa-tocopherol 300mg

BENEFITS OF GRAIN FREE DIET

To start off with, one needs to understand that carbohydrates are a crucial part in a pet's diet as they help to provide energy to the brain, regardless if it's a grain free formula or not.

Grain Free formulas also contain carbohydrates, so it's important to learn some facts about carbohydrates.

- 1. Healthier coat;** A grain free diet will show the results immediately. With the healthy ingredients that the food contains, in particular omega fatty acids, the coat will immediately look shinier and healthier.
- 2. Better Skin;** Certain dog food can sometimes result in itchy, dry, inflamed and irritated skin. A grain free diet can work wonders on your dog's skin thanks to the lower carbs and Omega 3 and Omega 6 Fatty acids.
- 3. Smaller Stools;** The corn and wheat that is usually found in standard dog food contains a lot of fibre, which dogs cannot digest properly. It therefore has to be removed within their stools.
- 4. Less Gas;** Grains tend to result in bad smelling. Apart from this being nasty, it is also very uncomfortable for the dog. Grain Free dog food helps to reduce gas and thus should there be a bigger problem one can tell easily.
- 5. Better Breath;** A film is usually left over a dog's teeth when eating grains. This is the result of more bacteria than usual in a dog's mouth. This can be washed away through saliva and water, however these bacteria can still cause a terrible stink.
- 6. Fewer Allergies;** Certain dogs can sometimes be allergic to grains. This can result in an itchy skin caused by the immune system working too hard.
- 7. More Energy;** Processed food has a lot of fiber stripped away. Dogs use up the energy that's in the food much more quickly. When given Grain Free food, the dog will burn the energy over a longer period of time.
- 8. Great for pregnant dogs;** When pregnant, a dog has to receive the required nutrients for oneself and for the puppies that she is carrying. Giving your dog more food will not work. A Grain Free Diet will give the dog and puppies more energy and can stay healthy both before and after birth.

From the age of 6 weeks. Specially formulated by nutritional experts, adjusting protein levels and kibble to accommodate individual sizes - complete with all the important nutritional elements to take puppy through to adult feeding.

INGREDIENTS:

Fish (dehydrated white fish/ dehydrated salmon/ salmon oil), Peas, Potatoes, Dehydrated chicken (9%), Animal fat (chicken) (8.2%), Beet pulp, Flax seed, Dried chicory (a natural source of FOS and inulin), Vitamins and minerals, Whole dried eggs, Brewery yeast, Dried Antarctic krill, Dried carrots, Dried apple, Salt, Dried cranberries, Dried tomatoes, Dried spinach, Dried kelp

ANALYSIS:

Crude protein 25.0%, Crude oils & fats 15%, Omega 3 fatty acid 1.1%, Omega 6 fatty acid 3.0%, Crude fibre 4.5%, Inorganic matter 7.5%, Calcium (Ca) 0.9%, Phosphorus (P) 0.7%, Magnesium (Mg) 0.1% **Energy:** ME(kJoule/kg) 3.479KJ

VITAMINS:

Vitamin A 15,000iu, Vitamin D3 1,500iu, Vitamin E, alfa-tocopherol 100mg

TRACE ELEMENTS:

Manganese - (II) - monohydrate 10mg, Zinc sulphate, monohydrate 140mg, Copper - (II) - sulphate, pentahydrate 10mg, Iron - (II) - sulphate monohydrate 100mg, Selenium (sodium selenite 0.2mg, Iodine (calcium iodate) 1.0mg

TECHNICAL ADDITIVES:

Natural Antioxidants, Preservative (citric acid)

DID YOU KNOW?

Puppies can be twins!

A litter of puppies may look all look alike (especially if they're the same breed), but mostly they are not identical.

However, one scientist in South Africa tested DNA on a set of puppies and found out that two of them actually were twins!

Double the cuteness!

MEATS

We take pride in sourcing the best ingredients for our pet foods and the opportunity to bring the highest nutritional values coming from fish and meats that give us an exotic range of choice.

PRINCE PREMIUM WET FOODS contain a variety of fresh meats that provide nutritional benefits to dogs of all ages, sizes and lifestyle and more than rabbit, pheasant, beef, chicken, turkey or lamb we include...

 **Bison** – lean high protein meat, ideal for issues related weight control and food allergies.

 **Buffalo** – palatable, lean high protein meat – concentration of iron and fatty acids.

 **Calf** – a rich source of nutrients – proteins, iron, and zinc. Also a good source of folic acid for the generation of cells.

 **Camel** – a mono protein that acts as a remedy to ease severe allergies that maybe triggered by other meat proteins.

 **Goat** – a healthy red meat, low in calories, fat and cholesterol, containing a naturally higher HDL count (good cholesterol) and naturally low LDL count (bad cholesterol).

 **Horse** – intense levels of iron, protein, vitamin B12 and omega 3 fatty acids.

 **Kangaroo** – high protein energy meat, low in undesirable saturated fats. An important source of several B group vitamins: riboflavin, niacin, vitamin B6 and B12 and a good source of omega 3.

 **Ostrich** – rich in iron and resistant to harmful bacteria – ideal for ph balance. Iron helps to transport oxygen from lungs to body cells, a key enzyme for energy production and metabolism.

 **Salmon** – to strengthen arteries, nervous system and support coat condition due to its high presence of omega 3 fatty acids.

 **Venison** – low in fat with a good source of B12 and B6 – iron helps to transport oxygen from lungs to body cells, a key enzyme for energy production and metabolism.

 **Wild Boar** – provides strength and fulfilment of nutrients, healthy blood for healthier heart and longer life span.

 **Reindeer** – Very taste flavour, but also healthy in nutrition: there are lots of health benefits in the ingredient.

 **Trout** – Fairly low in calories and it is a good source of protein and healthy fat.

SUPER PREMIUM

Legend

"A fusion of traditional extrusion combined with cold pressed production process, to guarantee the highest technological standards, for your furry companion."

BARF DIET

Biologically appropriate raw food diets (BARF) can make dramatic changes to the nutritional needs of your pet, adding another variety of diet rotation to your feeding regime.

Prince® Premium BARF DIET is a complete food that is grain free and does not require mixing with any other foods from our range.

Living enzymes help the body to function – found in raw foods they are beneficial to help restore, repair and maintain health. The process of cooking depletes the food of living enzymes, and for some pets this might put added stress on the pancreas, which can be replenished by eating raw unprocessed foods. Our convenient sausages contain living enzymes along with phytochemicals, antioxidants and unprocessed amino acids. Some pets will depend upon these factors to ensure a long and healthy lifespan.

BEEF MENU - 500g - 1kg

LAMB MENU - 500g - 1kg

INGREDIENTS:

Lamb muscle meat 39%, Lamb sternum 15%, Lamb lung 10%, Lamb green tripe 10%, Apples 8%, Carrots 8%, Lamb fat 5%, Zucchini 2%, Leaf salad 2%, Linseed oil 1%

ANALYSIS PER KG:

Crude protein 12.5%, Crude fats 9.3%, Crude ash 1.10%, Crude fibre 0.6%, Moisture 70.08

DUCK MENU - 500g - 1kg

INGREDIENTS:

Duck muscle meat 44%, Duck heart 20%, Bone cartilage 15%, Apples 8%, Carrots 8%, Zucchini or Pumpkin (Seasonal) 2%, Leaf salad 2%, Linseed oil 1%

ANALYSIS PER KG:

Crude protein 12%, Crude fats 16%, Crude ash 1.67%, Crude fibre 5.4%, Moisture 53.18%

CHICKEN & VEGETABLE MIX MENU - 500g

INGREDIENTS:

Poultry carcasses 60%, Apples 15%, Carrots 15%, Zucchini 5%, Leaf salad 5%

ANALYSIS PER KG:

Crude protein 9.9%, Crude fats 10%, Crude ash 22.04%, Crude fibre 0.1%, Moisture 69.72%

GREEN TRIPE MENU - 500g

INGREDIENTS:

Green tripe (Beef) 100%

ANALYSIS PER KG:

Crude protein 13.6%, Crude fats 7.8%, Crude ash 0.89%, Crude fibre 1.4%, Moisture 77.37%

Recommended daily serving by vets:

active dog - 10% of body weight

growing puppy - 10% of body weight

lactating females - 10% of body weight

less - active dogs - 5% of body weight

GOOSE MENU - 1kg

INGREDIENTS:

Goose muscle meat 44%, Goose Heart 20%, Bone Cartilage 15%, Apples 8%, Zucchini/Pumpkin(Seasonal) 2%, Leaf salad 2%, Linseed oil 1%

ANALYSIS PER KG:

Crude protein 14.7%, Crude fats 4.7%, Crude ash 5.1%, Moisture 75.2%, Crude fibre 0.3%

SALMON MENU - 500g

INGREDIENTS:

99.5% Salmon, 0.5% Linseed Oil

ANALYSIS PER KG:

Crude protein 15.2%, Crude fats 23.2%, Crude ash 2.83%, Moisture 58.42%, Crude fibre 0.1%

BEEF & GREEN TRIPE MENU - 500g

INGREDIENTS:

Bovine muscle meat 34%, Beef lung 33%, Beef green tripe 33%

ANALYSIS PER KG:

Crude protein 18.6%, Crude fats 6.8%, Crude ash 1.0%, Crude fibre 0.6%, Moisture 72.02%

BEEF TARTAR - 250g

INGREDIENTS:

100% Beef Tartar

ANALYSIS PER KG:

Crude protein 12.6%, Crude fats 8.2%, Crude ash 2.26%, Crude fibre 0.7%, Moisture 74.76%

CLASSIC 170g CANS

PRINCE PREMIUM quality reflects an improved all round condition. Adult dog food with 54% fresh natural meat packed full of the nutrients to optimise immune system, aid digestion and deal with daily stress and infection. The range offers a variety of palatable recipes to fulfil the need to be selective.

CHICKEN & TUNA WITH RICE GINSENG AND HONEY - 170g

INGREDIENTS:

25.5% Chicken, 25.5% Tuna, 3.0% Ginseng & Honey, 1.0% Rice, 45% Jelly solution (jelly, water, vitamin E)

ANALYSIS PER KG:

Protein 11% min, Fat 0.5% min, Fibre 1.0% max, Ash 3.0% max, Moisture 85% max

CHICKEN & TUNA WITH RICE AND SHRIMP CAVIAR - 170g

INGREDIENTS:

37% Tuna, 16% Chicken, 1% Shrimp caviar, 1.0% Rice, 45% Jelly solution (jelly, water, vitamin E)

ANALYSIS PER KG:

Protein 11% min, Fat 0.5% min, Fibre 1.0% max, Ash 3.0% max, Moisture 85% max

PACIFIC TUNA WITH RICE AND VANNAMEI SHRIMP - 170g

INGREDIENTS:

51.0% Pacific tuna, 3.0% Shrimp, 1.0% Rice, 45% Jelly solution (jelly, water, vitamin E)

ANALYSIS PER KG:

Protein 11% min, Fat 0.5% min, Fibre 1.0% max, Ash 3.0% max, Moisture 85% max

CHICKEN & TUNA WITH RICE AND CRABSTICK - 170g

INGREDIENTS:

25.5% Tuna, 25.5% Chicken, 3.0% Crabstick, 1.0% Rice, 45% Jelly solution (jelly, water, vitamin E)

ANALYSIS PER KG:

Protein 11% min, Fat 0.5% min, Fibre 1.0% max, Ash 3.0% max, Moisture 85% max

PACIFIC TUNA WITH RICE - 170g

INGREDIENTS:

54.0% Pacific tuna, 1.0% Rice, 4.5% Jelly solution (jelly, water, vitamin E)

ANALYSIS PER KG:

Protein 11% min, Fat 0.5% min, Fibre 1.0% max, Ash 3.0% max, Moisture 85% max

CHICKEN & TUNA WITH RICE AND SHRIMP - 170g

INGREDIENTS:

25.5% Chicken, 25.5% Tuna, 3.0% Shrimp, 1.0% Rice, 45% Jelly solution (jelly, water, vitamin E)

ANALYSIS PER KG:

Protein 11% min, Fat 0.5% min, Fibre 1.0% max, Ash 3.0% max, Moisture 85% max

CHICKEN TUNA WITH RICE - 170g

INGREDIENTS:

27% Chicken, 27% Tuna, 1.0% Rice, 45% Jelly solution (jelly, water, vitamin E)

ANALYSIS PER KG:

Protein 11% min, Fat 0.5% min, Fibre 1.0% max, Ash 3.0% max, Moisture 85% max

Maintains Healthy Skin & Coat

Rich in Meat

Maintains Healthy Intestines

PRINCE MAINTENANCE

Rich in meat to maintain healthy intestines and Omega 6 for coat and skin condition.

DOG	FEED
5-10kg	112-190g
10-20kg	190-320g
20-30kg	320-430g
30-40kg	430-535g
40-50kg	535-630g
50-60kg	630-725g

Feeding guidelines: Feed dry. Always have fresh, clean water available. For adult dogs with regular physical activity; the following daily amounts are recommended depending on their corporal weight.

Storage:

Keep in a dry and well ventilated place, away from light and sunlight.

PRINCE PUPPY - PUPPY 4KG / 20KG

INGREDIENTS:
Meat meal, Cereals, Vegetable meal and fats, Poultry fat, Minerals

ANALYSIS PER KG:
Crude Protein 30%, Crude Fat 15%, Crude Ash 10%, Crude Cellulose 2.20%, Moisture 10%

NUTRITIONAL ADDITIVES/KG:
Vitamin A 21,000ui, Vitamin D3 1,200ui, Vitamin E (Tocopherol) 120mg, Iron (Fe) 150mg, Copper (Cu) 12mg, Manganese (Mn) 11mg, Zinc (Zn) 132mg, Iodine (I) 2.1mg, Selenium (Se) 0.3mg, Antioxidants, Preservatives

PRINCE MINI - SMALL ADULT 4KG / 20KG

INGREDIENTS:
Dehydrated Meat Protein, Cereals, Plants by-products(sugar beet pulp), poultry fat, mineral substances

ANALYSIS PER KG:
Crude Protein 30%, Crude Fat 15%, Crude Fibre 2.20%, Crude Ash 10%, Moisture 10%

Storage:

Keep in a dry and well ventilated place, away from light and sunlight.

EDUCATION IS KEY

Getting to the 'bottom' of poor digestion means understanding the absorption of nutrients from the food that we and our pets consume. The process begins in the mouth with 'protease', the enzyme generated in the saliva by chewing*. This deals mainly with the breakdown of carbohydrates in preparation for the food's arrival in the stomach where other enzymes start to work.

Well-chewed food lightens the load on the stomach ready for the next digestive process to take over. At this point the pancreas, as the main player in the digestive game, releases 'amylase', the enzyme that continues to breakdown carbohydrates into complex sugars, and 'lipase' that deals with fats to produce the 'proteases' for digestive compounds to distribute protein into absorbable usable molecules.

Normal gut flora produces 'cellulase' and 'proteases' but its main job is to deal with the distribution of digestible fibre.

Nutritious food and regular meal times helps towards a healthy digestive system. When the gut is inhibited or devoid of the relevant enzymes any change may cause problems.

Nutritional Additives/kg: Vitamin D3 (3a671) 250 I.U., Vitamin E (3a700) 25 mg, Zinc (3b605) 12 mg, Manganese (3b503) 5 mg, Copper (3b405) 0.8 mg, Iodine (3b202) 0.25 mg, Biotin (3a880) 90 ug.

DID YOU KNOW?

Small and toy breed dogs tend to have higher metabolic rates than their larger cousins. This means that they tend to benefit from higher energy foods. Many dog food manufacturers produce specific small breed diets but where they are not available, puppy foods usually provide a good alternative.

CAT FOOD

PRINCESS PREMIUM AND SUPER PREMIUM 'grain free' dry and carefully prepared wet foods are designed to satisfy the different lifestyles of a fussy eater!

We do not compromise on ingredients; formulating our foods to the highest possible standards using only quality meats, fish, vegetables, fruits and a special selection of mixed herbs. This unique range of complete cat foods helps to fulfil the need for a natural diet.

Known to be very selective about what they eat, a cat will keep you guessing on its dietary needs. They are capable of regulating their required level of nutrients and will feed accordingly, but with our greater understanding and research

PRINCESS foods provides the variety and balance that meets their lifestyle - fulfilled enough to save precious areas of wildlife!

TURKEY WITH SWEET POTATO FORMULA

12kg · 2kg (6mm kibble)

RECOMMENDED FOR:
Adult Cats

INGREDIENTS:

Fresh turkey, dehydrated turkey meal, peas, sweet, potatoes, dried potatoes, dehydrated animal protein, animal fat, flax seed, beet pulp, brewer's yeast (a natural, source of MOS), potato protein, whole dried eggs, vitamins and minerals, dried chicory (a natural source of, FOS and inulin), dried Antarctic krill (a natural source of, EPA and DHA), plant extracts (Rosemarinus sp., Curcuma sp., Vitis sp., Syzygium sp., Yucca Schidigera)

ANALYSIS:

Crude Protein 31.0%, Crude oils & fat 15.0%, Crude ash 7.5%, Crude fibre 4.0%, Moisture 8.0%, Calcium (Ca) 1.4%, Phosphorus (P) 1.0%, Magnesium (Mg) 0.1%, Omega 6, fatty acid 2.1%, Omega 3, fatty acid 0.9%

Metabolic Energy: 3,830 kcal/kg.

VITAMINS:

Vitamin A 20,000 ui, Vitamin D3 1,750 ui, Vitamin E, alfa-tocopherol 300mg Amino acids: Taurine 1,500mg Trace elements: Iron (Fe) 70mg, Copper (Cu) 10mg, Zinc (Zn) 100mg, Manganese (Mn) 40mg, Iodine (I) 1.5mg, Selenium (Se) 0.2mg

SALMON WITH SWEET POTATO FORMULA

12kg · 2kg (6mm kibble)

RECOMMENDED FOR

Sterilised overweight and indoor cat

INGREDIENTS

Fresh salmon, dehydrated salmon, peas, sweet potato, dried potato flakes, potato protein, dehydrated animal protein, flax seed, brewer's yeast (a natural source of MOS), cellulose, beet pulp, animal fat, whole dried eggs, vitamins and minerals, dried Antarctic krill (a natural source of EPA and DHA), dried chicory (a natural source FOS and inulin), dried cranberries, plant extracts (Rosemarinus sp., Curcuma sp., Vitis sp., Syzygium sp., Yucca Schidigera)

ANALYSIS:

Crude Protein 31.0%, Crude oils & fat 10.0%, Crude ash 8.0%, Crude fibre 5.5%, Moisture 8.0%, Calcium (Ca) 1.2%, Phosphorus (P) 1.0%,

BARF FOR CATS

Biologically appropriate raw food diets (**BARF**) can make dramatic changes to the nutritional needs of your pet, adding another variety of diet rotation to your feeding regime.

Princess® Premium BARF DIET is a complete food that is grain free and does not require mixing with any other foods from our range.

Living enzymes help the body to function – found in raw foods they are beneficial to help restore, repair and maintain health. The process of cooking depletes the food of living enzymes, and for some pets this might put added stress on the pancreas, which can be replenished by eating raw unprocessed foods. Our convenient sausages contain living enzymes along with phytochemicals, antioxidants and unprocessed amino acids. Some pets will depend upon these factors to ensure a long and healthy lifespan.

BEEF MENU - 250g

INGREDIENTS:

Vitamin A 18,000 ui, Vitamin D3 1,200 ui,
Vitamin E (a-Tocopherol) 80 mg, Iron (E1)75 mg
Copper (E4)5 mg

PRINCESS STERILISED - ADULT 20KG - 2KG

INGREDIENTS:

Meat & animals by-products (poultry 4%), cereals (Barley 5%), plant by-products (sugar beet pulp), vegetables (legumes 4%), dehydrated fish protein, poultry fat, vegetable fiber, chicken flavour, fish & fish by-products, mineral substances, fish oil.

ANALYSIS PER KG:

Crude Protein 30.00%, Crude Fat 9.00%
Crude Ash 8.50%, Crude Cellulose 4.50%
Moisture 10.00%

NUTRITIONAL ADDITIVES/KG:

Vitamin A 14,400 ui, Vitamin D3 1,080 ui,
Vitamin E (a-Tocopherol) 180 mg, Taurine
1,100mg, Iron (E1) 162mg, Copper (E4) 15 mg,
Manganese (E5) 16mg, Zinc (E6) 117mg, Iodine
(E2) 8mg, Selenium(E8) 0.46mg

PRINCESS MAINTENANCE CHICKEN - ADULT 15KG

INGREDIENTS:

Meat and meat by-products, cereals, vegetable by-products, oils and fats (poultry fat min. 1%), mineral substances.

ANALYSIS PER KG:

Crude Protein 28.00%, Crude Fat 10.00%,
Crude Fibre 2.4%, Moisture 10.00%

NUTRITIONAL ADDITIVES/KG:

Vitamin A 12,800 IU, Vitamin D3 960 IU,
Vitamin E 160 mg, Taurine 1360 mg,
Iron (Fe) 144 mg, Copper (Cu) 14 m

NOTHING TO HIDE

Pet food labels have got to tell the truth, but designer packaging adds to the distraction of the finer points of what's in the bag. The convenience of processed pet food is one way for busy, caring pet owners to make meal times easy. But understanding the basics of pet food formulations is never straightforward and the use of scientific words becomes confusing.

First rule: to highlight the main source of ingredients, pet food manufacturers must, by law, list the first five to seven ingredients which carry the most weight in the formulations, followed by the lesser ingredients in sequence. This makes it easy to determine what's in the bag!

Second rule: evaluate the quality and quantity in the formulations by asking what protein is present, is it animal or plant, and is it fit for human

consumption? Fundamentally meat and its quality are key to good nutrition - by-product meat and other by-product ingredients are less desirable and consist of anything BUT the finer cuts.

What is good? Quality protein from quality fresh meat is the best, where honest 'meat meal' becomes the dried end product of a process that produces a protein powder. Concentrating the water content of fresh meat into a higher percentage of protein makes the product more caloric and concentrated.

Fibre is specified by name - look for beet pulp, brown rice, barley, oats, fruits, sweet potato and peas, to name a few. Fats and oils are also listed by name: chicken fat, herring fat, canola or sunflower oil and percentages of Omega 3 and 6 fatty acids. Note that quality food is preserved naturally, as in a range vitamins, herbs, extracts and ascorbic acid.

KITCHEN'S BEST

Feeding Guide Kittens

3 Months - 600g per day / 2 meals
 3-6 Months - 640g per day / 2 meals
 6-12 Months - 700g per day / 2 meals

Feeding Guide Adult Cats

3 kg - 207.5 per day / 2 meals
 4 kg - 640g per day / 2 meals
 6 kg - 700g per day / 2 meals

MEAT SELECTION 4 X 100G - 2 Chicken + 2 Liver

Chicken Ingredients:

Meat & animal derivatives (4% chicken), derivatives of vegetable origin (0.4% inulin), minerals

Liver Ingredients:

Meat & animal derivatives (4% liver), derivatives of vegetable origin (0.4% inulin), minerals

ANALYSIS PER KG:

Crude Protein 8.5%, Crude Oils and Fats 3%, Crude Ash 2.5%, Crude Fibres 1%, Moisture 82%

VITAMINS:

Vitamin D3 250 I.U., Vitamin E 10mg, Zinc 10mg, Manganese 2mg, Copper 0.2mg, Iodine 0.7mg, Taurine 450mg, Biotin 100mg

FISH SELECTION 4 X 100G - 2 Salmon + 2 Trout

Salmon Ingredients:

Meat & animal derivatives, fish & fish derivatives (4% salmon), derivatives of vegetable origin, vegetable protein extract, minerals, various sugars

Trout Ingredients:

Meat & animal derivatives, fish & fish derivatives (4% trout), derivatives of vegetable origin, vegetable protein extract, minerals, various sugars

ANALYSIS PER KG:

Crude Protein 9.0%, Crude Oils and Fats 5%, Crude Ash 2.5%, Crude Fibres 0.8%, Moisture 82%

VITAMINS:

Vitamin D3 290 I.U., Vitamin E 30mg

RED MEAT SELECTION 4 X 100G - 2 Lamb + 2 Veal

Lamb Ingredients:

Meat & animal derivatives (4% lamb), fish & fish derivatives, derivatives of vegetable origin, vegetable protein extract, minerals, various sugars

Veal Ingredients:

Meat & animal derivatives (4% veal), fish & fish derivatives, derivatives of vegetable origin, vegetable protein extract, minerals, various sugars

ANALYSIS PER KG:

Crude Protein 9%, Crude Oils and Fats 5%, Crude Ash 3%, Crude Fibres 0.8%, Moisture 82%

VITAMINS:

Vitamin D3 290 I.U., Vitamin E 30mg

WHITE MEAT SELECTION 4 X 100G - 2 Chicken + 2 Turkey

Chicken & Liver Ingredients:

Meat & animal derivatives (4% lamb), fish & fish derivatives, derivatives of vegetable origin, vegetable protein extract, minerals, various sugars

Chicken & Turkey Ingredients:

Meat & animal derivatives (4% veal), fish & fish derivatives, derivatives of vegetable origin, vegetable protein extract, minerals, various sugars

ANALYSIS PER KG:

Crude Protein 9%, Crude Oils and Fats 5%, Crude Ash 3%, Crude Fibres 0.8%, Moisture 82%

VITAMINS:

Vitamin D3 290 I.U., Vitamin E 30mg

CHICKEN WITH VEGETABLES IN GRAVY - 415g

INGREDIENTS:

Meat and animal derivatives (chicken 6%, of which 70% fresh meat), cereals, vegetables (carrots 4.5%), eggs and egg derivatives, minerals

ANALYSIS PER KG:

Crude Protein 7.2%, Crude Fibre 0.3%, Crude Fat 4.8%, Crude Ash 3.2%, Moisture 81%

VITAMINS:

Vitamin D3 150 U.I., Vitamin E (all rac-alpha-tocopheryl acetate) 10mg, Taurine 220mg, E6/Zinc 10mg, E5/Manganese 2mg, E4/Copper 1.4mg

BEEF WITH VEGETABLES IN GRAVY - 415g

INGREDIENTS:

Meat and animal derivatives (beef 6%, of which 70% fresh meat), cereals, vegetables (carrots 4.5%), eggs and egg derivatives, minerals

ANALYSIS PER KG:

Crude Protein 7.2%, Crude Fibre 0.3%, Crude Fat 4.8%, Crude Ash 3.2%, Moisture 81%

VITAMINS:

Vitamin D3 150 U.I., Vitamin E (all rac-alpha-tocopheryl acetate) 10mg, Taurine 220mg, E6/Zinc 10mg, E5/Manganese 2mg, E4/Copper 1.4mg

FISH IN GRAVY - 415g

INGREDIENTS:

Meat & animal by-products, cereals, fish & fish by-products (4% fish), minerals, vegetable-by-products, sugar

ANALYSIS PER KG:

Crude Protein 7%, Crude Oils and Fats 3.5%, Crude Ash 2%, Crude Fibres 0.3%, Moisture 82%

VITAMINS:

Vitamin D3 150 U.I., Vitamin E (all rac-alpha-tocopheryl acetate) 10mg, Taurine 220mg, E6/Zinc 10mg, E5/Manganese 2mg, E4/Copper 1.4mg

TURKEY & LIVER WITH VEG IN GRAVY - 415g

INGREDIENTS:

Meat and animal derivatives (turkey 6%, liver 5%, of which 70% fresh meat), cereals, vegetables (carrots 4.5%), eggs and egg derivatives, minerals

ANALYSIS PER KG:

Crude Protein 7.2%, Crude Fibre 0.3%, Crude Fat 4.8%, Crude Ash 3.2%, Moisture 81%

VITAMINS:

Vitamin D3 150 U.I., Vitamin E (all rac-alpha-tocopheryl acetate) 10mg, Taurine 220mg, E6/Zinc 10mg, E5/Manganese 2mg, E4/Copper 1.4mg

WILD GAME WITH VEGETABLES IN GRAVY - 415g

INGREDIENTS:

Meat and animal derivatives (game 6%, of which 70% fresh meat), cereals, vegetables (carrots 4.5%), eggs and egg derivatives, minerals

ANALYSIS PER KG:

Crude Protein 7.2%, Crude Fibre 0.3%, Crude Fat 4.8%, Crude Ash 3.2%, Moisture 81%

VITAMINS:

Vitamin D3 150 U.I., Vitamin E (all rac-alpha-tocopheryl acetate) 10mg, Taurine 220mg, E6/Zinc 10mg, E5/Manganese 2mg, E4/Copper 1.4mg

CHICKEN IN GRAVY FOR KITTENS - 415g

INGREDIENTS:

Meat and animal derivatives (chicken 15%, of which 70% fresh meat), cereals, eggs and egg derivatives, minerals

ANALYSIS PER KG:

Crude Protein 7%, Crude Oils and Fats 3.5%, Crude Ash 2%, Crude Fibres 0.3%, Moisture 82%

VITAMINS:

Vitamin D3 150 U.I., Vitamin E (all rac-alpha-tocopheryl acetate) 10mg, Taurine 220mg, E6/Zinc 10mg, E5/Manganese 2mg, E4/Copper 1.4mg

Meat and meat by-products (fresh chicken 50% min, beef 5% min, liver 5% min), Minerals

ANALYSIS PER KG:
Crude protein 9%, Crude fat 7.5%, Crude ash 1%, Crude fibre 0.5%, Moisture 82%

GOODIE SNACKS

FOR DOGS

RAWHIDE & JUICY MIDDLE TRI-BRAID WITH CALCIUM

PACKET OF 5 SMALL BRAIDS /
PACKET OF 3 MEDIUM BRAIDS

- Highly digestible
- Healthy teeth & gums
- Healthy bones and joints

INGREDIENTS:

Rawhide, Wheat starch, Soy protein isolate, Chicken flavour, Food colorants, Dietary fibres, Calcium carbonate, Sodium caseinate, Compound yeast, Small peptide protein (from fish), Animal fats (fish)

ANALYSIS PER KG:

Energy 1304KJ, Crude protein 71.2%, Crude oils and fats 2.77%, Crude fibres 0.49%, Crude ash 2.02%, Moisture 13%, Sodium 0.066%, Calcium 0.74%, Total phosphorus 0.11%

OAT BONE OAT

PACKET OF 7 MEDIUM BONES

- Rich in plant essential oils
- Healthy teeth & gums
- Fresh Breath

INGREDIENTS:

Oat flour, Glycerin, Natural flavour (Oat flavour), Isomalto-oligosaccharide, Food colorants, Compound yeast, Sodium caseinate, Essential oils

ANALYSIS PER KG:

Energy 1089KJ, Crude protein 47.43%, Crude oils and fats 7.62%, Crude fibres 0.49%, Crude ash 1.52%, Moisture 13%, Sodium 0.08%, Calcium 0.059%, Total phosphorus 0.18%

BBQ BONE BACON FLAVOUR

PACKET OF 5 SMALL BONES /
PACKET OF 3 MEDIUM BONES /
PACKET OF 1 BIG BONE

- Highly digestible
- Healthy teeth & gums

INGREDIENTS:

Vegetable protein, Wheat flour, Natural Collagen, Soya bean lecithin, Small peptide protein, Cheese powder, Natural antioxidant, Bacon flavour, Potassium sorbate, Caramel colorant

ANALYSIS PER KG:

Energy 1059KJ, Crude protein 46.75%, Crude oils and fats 7.13%, Crude fibres 0.49%, Crude ash 3.13%, Moisture 13%, Sodium 0.27%, Calcium 0.51%, Total phosphorus 0.24%

DENTAL BONE WITH

PACKET OF 7 SMALL BONES /
PACKET OF 4 BIG BONE

- Rich in plant essential oils
- Healthy teeth & gums
- Fresh Breath

INGREDIENTS:

Wheat protein, Whey protein, Emulsified fats, Lactose, Food colorants, Calcium carbonate, Sodium caseinate, Dietary Fibres, Essential oils, Glycerine, Natural flavour

ANALYSIS PER KG:

Energy 1113KJ, Crude protein 51.31%, Crude oils and fats 6.53%, Crude fibres 0.49%, Crude ash 6.77%, Moisture 13%, Sodium 0.074%, Calcium 2.4%, Total phosphorus 0.11%

SOFT CREAMS FOR CATS

NEW

TUNA WHITEMEAT WITH SHRIMP - 85g

INGREDIENTS:

Tuna 30%, Shrimp 5%, Gravy Solution 65.0% (Water, Modified Tapioca starch, Guar Gum, Xanthan Gum, Vitamin E)

NEW

TUNA WHITEMEAT WITH SALMON - 85g

INGREDIENTS:

Tuna 30%, Salmon 5%, Gravy Solution 65.0% (Water, Modified Tapioca starch, Guar Gum, Xanthan Gum, Vitamin E)

NEW

TUNA WHITEMEAT - 85g

INGREDIENTS:

Tuna 35%, Gravy Solution 65.0% (Water, Modified Tapioca starch, Guar Gum, Xanthan Gum, Vitamin E)

NEW

Miracle Oils For Cats

ALLERGY REMEDY - 500ML / 1L

PRINCESS Miracle Allergy Remedy oil is 100% natural and particularly suitable for cats with skin irritation or a dull coat. The specially selected combination of oils and herbs works simultaneously to soothe itching and burning. The balanced content of Omega 3 and 6 fatty acids will also contribute towards a shiny, healthy coat.

COMPOSITION:

cold pressed rapeseed oil 66.2%, salmon oil 15%, herbal mixture 16.5%, vegetable oil special 2.3%

ANALYSIS:

cold pressed rapeseed oil 66.2%, salmon oil 15%, herbal mixture 16.5%, vegetable oil special 2.3%

Miracle Oils For Dogs

INSECT REPELLENT - 500ML / 1L

PRINCE Miracle Insect Repellent Oil has been formulated to repel and intercept bites from all types of insects and fleas. The special blend of herbs will also discourage fleas from thriving on the dog's coat.

The composition of ingredients also helps to relieve and neutralize pain and itching, supporting an immediate healing process. This product is highly recommended for dogs that spend time outdoors or exercise in fields.

COMPOSITION:
cold pressed rapeseed oil 48.5%, salmon oil 30%, herbal mixture 17%, vegetable oil special 3%, lecithin 1.5% - Total Composition 100%

ORGANIC HERBAL BLEND:
peppermint, liquorice root, thyme, crushed garlic, marigold, camomile, yarrow, milk thistle

ANALYSIS:
crude protein 2.5%, crude fat 82.5%, crude fibre 4.5%, crude ash 1.5%, metabolic energy 30.6 MJ/kg

ALLERGY REMEDY - 500ML / 1L

PRINCE Miracle Energy Oil has been developed to supplement the energy levels of active and working dogs, boosting the dog's system. This 100% natural product adds shine to the coat with high levels of omega 3 and 6 fatty acids and the combination of herbs contribute towards strengthening stamina, the immune system and well-being.

COMPOSITION:
cold pressed rapeseed oil 54%, salmon oil 40.5%, herbal mixture 4%, lecithin 1.5% - Total Composition 100%

ORGANIC HERBAL BLEND:
peppermint, ginger, nettle, horsetail, yarrow, milk thistle.

ANALYSIS:
crude protein 0.3%, crude fat 96.5%, crude fibre 0.5%, crude ash 0.3%, metabolic energy 35 MJ/kg

ENERGY PLUS - 500ML / 1L

PRINCE Miracle Energy Oil has been developed to supplement the energy levels of active and working dogs, boosting the dog's system. This 100% natural product adds shine to the coat with high levels of omega 3 and 6 fatty acids and the combination of herbs contribute towards strengthening stamina, the immune system and well-being.

COMPOSITION:
cold pressed rapeseed oil 54%, salmon oil 40.5%, herbal mixture 4%, lecithin 1.5% - Total Composition 100%

ORGANIC HERBAL BLEND:
peppermint, ginger, nettle, horsetail, yarrow, milk thistle.

ANALYSIS:
crude protein 0.3%, crude fat 96.5%, crude fibre 0.5%, crude ash 0.3%, metabolic energy 35 MJ/kg

JOINT REMEDY - 500ML / 1L

PRINCE Miracle Joint Remedy Oil contains herbal, fish and shellfish properties to support and prevent joint problems. It is useful for working dogs enduring strain or heavy exercise. With added benefits for older dogs, it is also highly recommended for all ages to maintain healthy joints and muscles. This 100% natural product will help to strengthen the immune system while contributing towards maintaining a healthy coat.

COMPOSITION:
cold pressed rapeseed oil 57%, salmon oil 33.5%, green lipiped-mussel 5%, herbal mixture 3%, lecithin 1.5%

ORGANIC HERBAL BLEND:
peppermint, liquorice root, thyme, crushed garlic, marigold, camomile, yarrow, milk thistle

ANALYSIS:
crude protein 25.8%, crude fat 88.5%, crude fibre 0.5%, crude ash 0.9%, metabolic energy 34 MJ/kg

9 OILS FOR SHINY COAT - 500ML / 1L

PRINCE Miracle 9 Oils for Shiny Coat is a very high quality product which consists of natural oil extractions from Salmon, Sand Eel, Sprat, Pout, Whiting, Blue Whiting, Horse Mackerel, Mackerel and Herring.

It can be used as a daily supplement to the dog's diet and guarantees a glossy and stunning coat due to the high concentration of polyunsaturated fats which are a good source of cell membrane function and also help to reduce inflammatory response.

Ideal for dogs that suffer with itching problems.

COMPOSITION:
salmon 60%, sand eel 26%, sprat 3%, pout 3%, whiting 2%, blue whiting 2%, horse mackerel 2%, mackerel 1%, herring 1%

ANALYSIS:
crude protein 0%, crude fat 100%, crude fibre 0%, crude ash 0%, metabolic energy 35.5 MJ/kg

PRINCE SHAMPOOS

FREE FROM DEA & SULFATE ADDITIVES, ETHOLENE OXIDE & PARABEN

NO SOAP • NO DETERGENTS • NO PERFUME

ALL COATS WITH SHEA BUTTER

INGREDIENTS:

Water, Sodium Laureth Sulfate, Sodium Cocoamphoacetate, Glycerium, Polyquaternium-7, Glycol Distearate, Coconut Oil Amide EDA, Sodium Chloride, PEG-7 Glyceryl Cocoate, Fragrance, Guar Gum Hydroxypropyl Trimethylammonium Chloride, Citric Acid, Methylisothiazolinone

BLACK COATS WITH MOROCCO NUT FRUIT OIL

INGREDIENTS:

Water, Cocamidopropyl betaine, Coconut Oil Amido MEA, Sodium Laureth Sulfate, Anemone Glucoside, Sodium Glycol Distearate, Polyquaternium-10, Fragrance, Methylisothiazolinone, Tetrasodium EDTA, Citric Acid

Copolymer, Methylisothiazolinone

ULTRA SOFT COATS WITH MOROCCO NUT FRUIT OIL & OMEGA 3&6

INGREDIENTS:
Water, Cetostearyl Alcohol, Behentrimonium
Chloride, Propylene Glycol, Fragrance, Hydroxy
Propyl Benzene

BACTERIAL CLEAN

Ideal for pets that suffer from contact allergy, it prevents dermatitis and pyoderma problems as it is free of high concentrations of quaternary ammonium salts, ammonia, bleach and other components and the caustic elements that maybe harmful when in contact with coat and eyes.

Bacterial Clean, in accordance with legal recommendations, inhibits the proliferation of small flying insects. It can be applied on any type of hard flooring and is an excellent replacement for conventional chemical detergents. PRINCE Bacterial Clean is highly concentrated and can be used sparingly. It will clean and sanitise all types of flooring (terracotta, granite, marble, waxed wood) and pets bedding, dens, grooming tables and more.

TOP 10 LITTER TIPS

Choosing a litter.

Cats like it fine, they like it soft. Clumping litter are finer grains, clay litter reduces odours.

Choosing a tray.

Designer trays for owners may not suit their cat, covered trays require more attention but for the cat - plain and simple is all it needs.

Location.

Convenience and privacy are the two main points of location - ideally placed away from water and feeding bowls.

Training.

Instincts will generally guide a cat to its litter tray, make it accessible, make it fun and leave the business to the cat!

Odour.

Scented litter will mask odours but if you have a fussy cat then keep an air freshener near the litter box.

Cleanliness.

Cats like to be clean, a daily scoop is first on the agenda and litter changes, according to needs, followed by a good scrub with a delicate solution to maintain familiarity of its territory.

Depth of Litters.

Less is more, no more than two inches in depth is about all a cat will need and long haired cats prefer a smooth slick surface. Adding extra litter also adds a problem to cleaning.

Multiple Litters.

For peace and harmony, multcats, multi litter trays stops queuing for the bathroom.

Problems.

If your cat stops using the litter tray, check with your veterinarian as medical problems might be the cause, otherwise it's your cat being a cat and looking for attention, perhaps?

Behaviour.

Punishing a naughty cat is not the answer, nor banishing it to the great outdoors. For ongoing or complex situations, an animal-behaviourist will have the experience to help resolve any issues of concern.

The Facts of Stress

Like us, dogs can and do experience stress. Just as stress can make us feel afraid or hyper or edgy or irritable, it can do the same to our dogs. It is a well established fact that chronic or long-term stress will likely have a detrimental effect on a dog's behaviour, health and overall well-being.

The systems in the dogs body which control stress are virtually identical to those in our body. Stress affects an individual both physiologically and emotionally, and the two are always interconnected. The biggest difference between "good" stress (eustress) and "bad" stress (distress) is the length of time the organism is under stress and a matter of how the stress affects the subject emotionally. When something stressful happens the body falls under control of the Sympathetic Autonomic Nervous System (SANS). Note that the brain is hard-wired to always remember negative emotional responses to help ensure our future safety. When the dog is stressed or frightened, dopamine and noradrenaline are released causing the stimulation and anxiety of the CNS. If the dog is chronically stressed these two neurotransmitters can become depleted causing depression.

Common causes of stress in dogs are: grief due to loss of a companion (human or animal), living with a family that frequently argues; excessive stimulation (too much play, daycare, dog sports, etc.), insufficient stimulation, too many dogs per available space, any change in their environment (schedule, people, animals, increased noise), punitive training (shock,

choke and prong collars), a mixture of reward based training and corrections based training, inappropriate play partners, unreasonable expectations by us (we expect our dog to always like all people and all other animals in all situations), insufficient social time/family time, traumatic events, and many more.

Dogs express themselves and communicate with body language, vocalisations and behaviour. By getting familiar with our dogs' bodies, we can tell when they start to feel stressed. It is imperative to look at the entire body and not just isolated parts to get the best understanding of what your dog is feeling. When stressed a dogs behaviour will often change. Common behaviours that are often stress induced are: being restless, an inability to relax, poor sleeping habits (less than 17 hours of sleep per day), excessive sleeping, becoming jumpy/hyper vigilant, irritable, destructive, excessive self-grooming, loss of appetite, obsessive/compulsive behaviors (e.g. shadow chasing), an inability to focus, hyperactivity, increased urination and defecation, and vomiting and diarrhoea.

The easiest way to deal with a dog under stress starts with understanding and then removing the dog from the

situation/context where the stress occurs. While this does not solve the problem, it is a temporary fix which will make the dog feel better. Some vets may also recommend changes in diets, treatment with complementary therapies (Bach Flower Remedies, herbs, homeopathy) if they are so qualified, and if they are a veterinary behaviourist they may recommend the use of certain drugs.

KEEP YOURSELF INFORMED

Instinctively pets know what is good nutrition; going back to their days in the wild when diet rotation was of their own choosing. Domestication has now forced change in eating habits creating a series of health issues and allergies associated with food. Now with optimum nutrition to achieve the best physical and mental ability for a longer life the PETPRINCES menu has been formulated with passion.

Our PREMIUM range - PRINCE for dogs and PRINCESS for cats - are densely packed with a vast integration of high quality protein and healthy nutrients. These foods have been tried and tested, passing through a series of tests to ensure that they are devoid of artificial flavours, colourants and preservatives - enabling us to provide a full declaration of ingredients.

Recipes do not compromise on quality - using only human-grade meats - meat that is gmo free and not tested on animals (ISO 22,000*) and responsibly sourced fish. The inclusion of fruits and vegetables combined with the integration of herbal and botanical extracts contribute further to improve and strengthen the immune system, helping your dog or cat to enjoy maximum health while preventing a list of possible diseases and allergic reactions.

Our aim is to offer the nearest substitute to natural feeding but with a better balance and based on theory of 'you are what you eat', we promise to fulfil a healthy life for dogs and cats from birth through to old age by incorporating the very important need for diet rotation in a processed food. The power of varying quality nutrients on a daily or weekly basis ensures a complete feeding regime for a complete happy, healthy and, these days, a longer life.

When choosing your pet food we recommend that you always read the label, check the ingredients and observe the quality - labels tell you what you are feeding and concentrated food means feeding less

reduces the cost per meal.

You are in control of caring for your pet's health, which is equal to caring for yourself, and with help from PRINCE and PRINCESS you can rest assured that we are not only here to supply food to suit each lifestyle, we are also here to ensure nutritional support from experts.

Less is not always more when we speak of nutritional values in processed foods for you or your pet. The formulation of a processed food is designed to meet the demands of a busy lifestyle, it saves time but does it save life - in the long term? Amalgamations of indigestible or inappropriate carbohydrates and deprived or even diseased meat supplements and chemicals contribute towards shortened life.

Beware of:

Cheaper foods with low-grade ingredients may cause restlessness, allergic reactions such as tummy upsets, skin and coat problems that may eventually cost you more in veterinary consultations.

- Derivatives - cheap ingredients with little or no nutritional value - such as meat derivatives and by-products
- 'Excessive' grains and cereals - lower digestive enzymes, deplete metabolic energy and increase the glycemic index in blood sugar levels
- Artificial colourants, and additives such as BHA, BHT, ethoxyquin are known to cause strain on vital organs, increasing possible disease
- High levels of sodium selenite are known to cause strain on vital organs, increasing possible disease affecting blood, muscles and liver. Also common grains fed to meat producing animals may contain sodium selenite, increasing the risk of being present in the sourcing of fresh meat.

WEIGHT CONTROL

Good health is visible through glossy coat, bright eyes, strong bones, supple joints, strong teeth and gums, and in the process of each life stage weight control is also of prime importance as your pet's nutritional needs change with age.

Overweight dogs and cats has become the norm, but research shows that they live longer if they are kept slightly underweight. A high quality protein, low-carbohydrate diet (as featured in our PROTEIN FACTS -page 12) results a in healthier weight loss and better muscle mass retention than high-fibre "weight loss diets. This makes good sense when we consider that ow dogs and cats' ancestors are designed to eat prey animals -high in protein, relatively high in fat, and very low in carbohydrates.

Most pets will be tempted by a treat, pet training encourages treat rewards, but there are ways to moderate the treat calories without making your pet (or you) feel deprived. Larger treats can be broken into smaller pieces or provide a lower calorie treat (PRINCE and PRINCESS grain free Soft Snacks or Alaska fish treats). Limit rawhide bones, marrow bones, and other "chevt treats; many of them are very high in fat and calories.

To your dog or cat, it's more about the attention and love from you that they associate with treats, than about the treat itself. Whatever treats or "shared' food your pet gets, you need to deduct treat calories to serve a balance meal -that means what goes in the bowl needs to be less!

In addition to providing a wholesome, appropriate diet, there will be times when they need an extra boost. There are supplements that will help your pet get the most from its food, as well as strengthen the immune system, optimize overall health, and support longevity. These include: Omega-3 fatty acids, digestive enzymes, and probiotics. (PRINCE and PRINCESS Miracle Oils and Powders).

Counting calories is the best way to understand what were feeding our cats and dogs. Combined with calorie information from the food and treats you feed your pet, you can calculate how much food to feed.

CALORIES IN PET FOOD

FOOD TYPE	CAT	DOG
Dry Adult	200-600 kcal/cup	300-600 kcal/cup
Dry Diet	200-400 kcal/cup	200-400 kcal/cup
Canned Adult	80-200 kcal/5.5-6oz	200-400 kcal/12.5-13.2oz
Canned Diet	80-200 kcal/5.5-6oz	200-400 kcal/12.5-13.2oz
Raw	300-550 kcal/cup	300-550 kcal/cup
Treats	10-300 kcal/treat	10-300 kcal/cup

Guide to a healthy weight: (also applies to cats)

Very thin: is 20% below an ideal body weight

Ribs, spine and hipbones visible

- less muscle bulk
- no fat under skin

Score 1

Thin: is 10-20% below an ideal body weight

Ribs, spine and hipbones apparent

- obvious waist and abdominal tuck
- little fat under skin

Score 3

Ideal weight and size:

Ribs, spine and hipbones easily felt

- visible waist with an abdominal tuck
- small amount of fat is apparent

Score 5

Overweight: is 10-15% above an ideal body weight

Ribs, spine and hipbones are difficult to feel

- waist barely visible with broad back
- layer of fat on belly and at base of tail

Score 7

Obese: is more than 15% above an ideal body weight

Ribs, spine and hipbones extremely difficult to feel under a thick layer of fat

- No waist can be seen and belly may droop significantly
- layer of fat on belly and at base of tail

Score 9

FOOD FOR ENERGY

What portions should I feed my dog or cat to meet its energy needs? That is the question that presents many pet owners with a dilemma.

As a pet food provider we offer general recommended guidelines, but they will need to be fine tuned when taking lifestyle into consideration. Skin and coat density, age according to breed, size, neutering, weight loss and growth rates in puppies/hittens, combined with activity and resting levels as in working dogs or active cats all need to be accounted for. There will always be a minor inconsistency based on air temperature and coat insulation which will affect energy levels.

Everyone is different. Of course its easier for humans to calculate calories needed against age and activity level because we are all very similar in structure. But with pets you only need to compare a Large working dog that lives outside with a small dog living life in the comfort of your home to highlight the huge difference in their caloric needs (as shown).

Cheap poor quality food = more cost because food has to be increased to fulfil energy and nutritional requirements + generates more waste and possibly results in becoming overweight with possible digestive/behavioural problems.

High quality costly food = less cost because the concentration of ingredients means feeding less to fulfil energy and nutritional requirements + generates less waste with the ability to maintain a healthy weight and a contented lifestyle.

To make this calculation properly you should feed high quality food and check the feeding guides shown on the label.

Whether your dog or cat is an adult or a growing puppy/kitten, following its RER against its accurate weight and targeted weight, you can establish a truer feeding rate to achieve and maintain its correct healthy body weight throughout. Remember to regulate food in accordance with environmental factors and the additional calories taken in the form of treats or table foods.

You might not be aware that your pet is overfed and under exercised and a monthly weighing regime is the best way to monitor the situation, especially when an adult pet is moving into its senior years because caloric requirements diminish.

Simple tip: how to weigh your pet on the bathroom scales (depending on its size). Weigh yourself holding the pet and then weigh yourself without the pet and deduct the difference.

Always ask! If you are unsure then our advice is readily available but consulting a veterinary professional is important for reassurance.

MATTHEW WISMAYER 2014

RESTING ENERGY REQUIREMENTS (RER) shows the variability of energy requirements based upon activity. This value may be based on breed standards, but you can estimate your pet's daily caloric needs using these formulas:

1 Resting Energy Requirement (RER) / 30 (weight in kg) + 70 = kcal

2 Metabolic Energy Requirement (MER) / RER x Multiplier (see chart right) = kcal

3 This will give / Target daily caloric intake:

Example:

Pet weighs 15 pounds (6.8 kg). Body condition score is around 6-¹/₂, and its ideal weight is 12 pounds.

Pet's Resting Energy Requirement (RER) / 30(6.8) + 70 = 274 kcal

Pet's Metabolic Energy Requirement (MER) / RER x Multiplier (0.8) = 219 kcal

Pet's target daily caloric intake: 219 kcal x .18 = 39.42g

In canned food terms, this is between 1 and 3 cans per day.

For dry food, this may be anywhere from 1 cup per day to only

¹/₃ cup per day!

FELINE LIFESTAGE	X RER	CANINE LIFESTAGE	X RER
Neutered Adult	1.2	Neutered Adult	1.6
Intact Adult	1.4	Intact Adult	1.8
Active Adult	1.6	Low Active Adult	2
		Moderate Active Adult	3
		High Active Adult	4.8
Obese Prone	1.0	Obese Prone	1.4
Weight loss	0.8	Weight loss	1.0
Critical care	1.0	Critical care	1.0
Weight gain	1.2-1.4	Weight gain	1.2-1.4
Gestation	1.6-2.0	Gestation (0-42 days)	1.8
Lactation	2-6	Lactation	4-8
Growth	1.2-1.4	Growth (0-4 months)	3
Post-neuter (4-12 months old)	< by 25%	Growth (4 months – neuter)	2

MUSCLE CONDITION

Muscle condition is assessed by sight and feel. The areas to observe are the spine, scapulae (shoulders), head, and sides of the ilia (hip muscles). Muscle degeneration varies in other areas of the body but is first noted, and is most visible, in the muscles either side of the spine.

WHY?

Undernourished, lack of exercise, ill health and old age all contribute to the condition, but notably, being overweight can have a significant impact.

Muscle condition is graded in three stages from normal, mild and moderate to severe, where bone structure becomes clearly visible.

A good quality diet, regular exercise and veterinary checks will help to keep your pet in tip top condition.

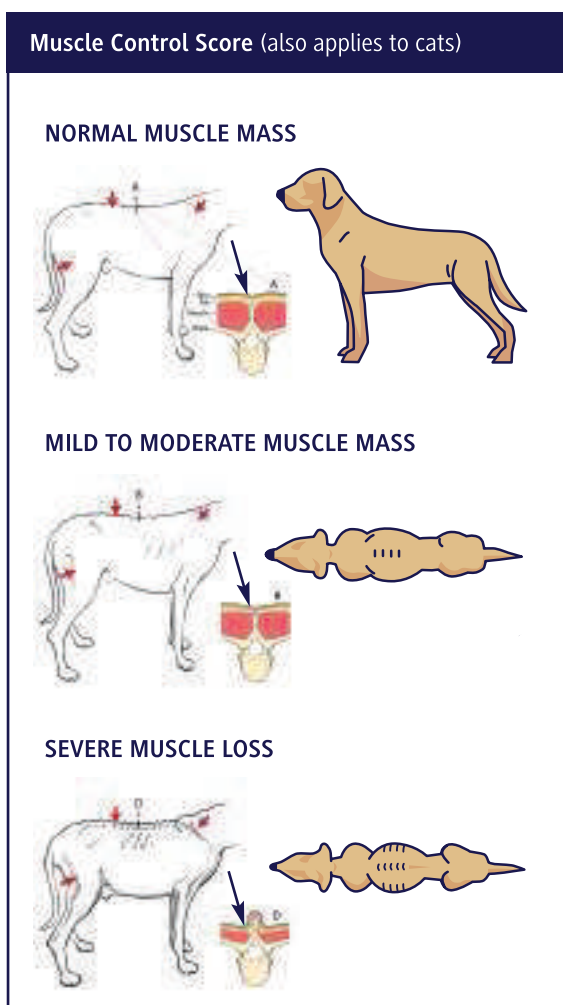

FEEDING AWARENESS

Every dog and cat is different and although we provide the daily recommended feeding guides for the ideal body weight, lifestyle and the environment, weight control, body condition and treats must be accounted for and portions adjusted accordingly.

General appetite may vary but in order to regulate digestion, blood sugar levels and signs of hyperactivity or nervousness we would recommend feeding twice daily – dividing the daily feeding rates into two meals.

Introducing new food: Changing food should be a gradual process. Mix with current food, increasing daily until the changeover is complete. This will ensure a smooth transition so that your pet adjusts to a new regime without an upset tummy.

Ensure that you read the feeding guides in relation to your choice of food.

DIET ROTATION

- If choosing to feed grain free dry foods we would always recommend mixing wet with dry
- Mixing dry food with wet food combines a variety of tastes with a great textured kibble that is designed to help maintain healthy teeth and gums.
- Our wet foods have a variety of exotic meats that provide additional nutritional benefits, making diet rotation even more valuable, just as nature intended.
- The quantities are only intended as a guide and should be adjusted to suit size, age and level of activity.

FEEDING GUIDES

Mixing dry food with wet food gives a variety of tastes combined with texture. Dry food contains a higher content of calories per gram than wet food which explains the difference in our feeding ratios – mixing wet with dry, as shown in feeding guides.

Changing food should be a gradual process, mixing with current food increasing daily until complete. Always read the feeding guide in relation to your choice of food against breed, age and weight. The quantities are only intended as a guide and should be adjusted to suit size, age and level of activity. Ensure plenty of clean drinking water available – your dog/cat will drink more on dry food.
